EDUCATION

Texas A&M University

College Station, TX

*Bachelor of Science in Computer Engineering, Minor in Mathematics, **GPA: 3.6***

Aug 2023 – May 2027

- Relevant Coursework: Data Structures and Algorithms, Software Engineering, Introduction to Computer Systems, Computer Architecture and Design, Discrete Mathematics

EXPERIENCE

Line Cook

Feb 2025 – Present

Mai Shan Yun

College Station, TX

- Maintained **99% order accuracy** as measured by daily quality audits by executing **200+ orders per day** under high-volume kitchen conditions, applying consistent process discipline and clear team communication

PROJECTS

SLANNtea | *React, Node.js, Express, PostgreSQL, Passport.js, Git, Jira*

Mar – May 2026

- Shipped **8 production REST API endpoints** as measured by full coverage of the POS system's order and inventory operations by designing an **object-oriented** Express route layer and session-based authentication (Passport.js, PostgreSQL-backed sessions) from scratch
- Designed a normalized **PostgreSQL** schema spanning products, modifiers, ingredient-level inventory, orders, and rewards as measured by **zero overselling incidents** during testing by enforcing stock checks at the database layer
- Enabled **4 downstream consumers** (POS, kiosk, chatbot, reporting) to integrate without duplicated logic as measured by zero client-side pricing errors by centralizing order-total computation behind a single, scalable REST contract

AniVibe | *Python, FastAPI, PostgreSQL, Supabase, Gemini API, Jikan API*

May 2026

- Built a natural-language search engine over a **20,000+ title** anime dataset as measured by **98% query-to-result relevance accuracy** by designing a 4-stage pipeline: LLM query parsing, constrained SQL generation, **algorithmic** semantic reranking, and live metadata enrichment
- Architected independent failure handling across all 4 pipeline stages as measured by graceful degradation to simpler queries by isolating each stage into separable, **object-oriented** service components

Debt Dungeon | *React, TypeScript, Express, PostgreSQL, Prisma, Zustand*

Jun 2026 – Present

- Designed an **object-oriented** relational schema and transactional payment system as measured by zero data inconsistencies across debt-balance updates by modeling debts, payments, and amortization-based interest as atomic **Prisma** transactions

ACTIVITIES

Lead Developer

Jan 2026 – May 2026

Suture The Future

College Station, TX

- Served as sole technical point of contact for a **React/TypeScript** portal used by **50+ event applicants** as measured by direct resolution of all reported issues by independently owning the codebase through its full lifecycle

Project Manager

Aug 2024 – May 2025

Aggie Coding Club

College Station, TX

- Managed **2 Agile teams of 10+ developers** as measured by on-schedule delivery of full-stack applications across 2 semesters by introducing structured **code reviews** and automated testing

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, SQL, C++

Backend: Node.js, Express, FastAPI, REST API Design, Object-Oriented Design, Passport.js, Prisma

Databases: PostgreSQL, Supabase

Frontend: React, Vite, Zustand

Tools & Practices: Git, GitHub, GitLab, Jira, Agile/Scrum, Code Review

AI/LLM Integration: Gemini API, Prompt-Constrained Structured Output Generation
